

Greetings!

Our institution is participating in the American Board of Orthopaedic Surgery's Knowledge, Skills, and Behavior (ABOS KSB) Program. A 360-evaluation of Professional Behavior is a part of the evaluation of our orthopaedic residents.

On October 15, 2024, an email requesting an evaluation of Orthopaedic Surgery Residents will be sent to you from ksb@abos.org with the subject line: **ABOS KSB Program- 360 Professional Behavior Assessment Request**. You will be able to click a link next to each resident's name to complete a very brief Professional Behavior Evaluation for each resident with whom you feel you are sufficiently familiar to evaluate.

If you are unable to evaluate the professional behavior skills of a specific orthopaedic resident because you have not worked with the resident, you should not complete an evaluation for that resident.

Please note that only the Program Coordinator and I will have the ability to identify evaluators and view content of the evaluation. I will be able to review an aggregate report with each resident.

If you would like any assistance, please let me know.

Please try to complete the assessment by 11/15/2024.

Sincerely,

_____ (Program Director)
